Project title: Creativity Learning Module (CLM) for Architecture and Surveying Students

Principal Investigator: Professor C.J. Webster, Faculty of Architecture

Deliverable 1:
Two-day workshop at the HKU Shanghai Study Centre (HKUSSC) in Shanghai during Fall 2015 - Creativity Learning Module (for 30 (BAAS 3) students and 30 BSc(Surv) students)

During the workshops, students were provided with:
• Guidance in goal setting.
• Detailed interpretation of their own data.
• A framework for understanding themselves and for understanding others (i.e. the range of different motivations, behaviors and needs to enable them to calibrate their own).
• Experiential learning through two collaborative creative exercises.
• A framework for understanding different aspects of and expressions of creativity.
• A model for communicating with others based on the other person’s broad underlying needs.
• A range of perspectives and advice on making career choices, transitioning into the marketplace and developing their careers in line with their motivations and strengths; advice on and practical applications of their career matching data.
• Reflection booklets were used throughout the two days for students to capture their learning and action points.
